Continuation of 3. NOTE: Applicants' response, including Exhibit A, have been fully considered by the Examiner. Regarding Exhibit A, it should be noted that this document has been entered on the record as an affidavit. Said Exhibit, while having been considered, is NOT considered a formal affidavit, particularly since it is not a sworn statement. Rather the Exhibit is data which is presented in support of Applicants remarks. However, the amendments made to the claims, namely to both claims 1 and 5, would be persuasive enough to overcome the rejection as discussed below (see comments to 5). However, neither the amendments, nor the remarks and evidence (e.g. Exhibit A) will not be entered on the record because the proposed amended claims raise new issues not previously addressed and would necessitate a new search.

Continuation of 5. Applicant's reply has overcome the following rejection(s): As noted in 3(a) above, the amendments made to claims 1 and 5, were they to be entered on the record would be sufficient to render moot the rejection to claims 1, 2, 4-6, 8, 9, 20 and 21, under 35 USC 103(a) as being unpatentable over the combined teachings of Biberman et al. (US Pre-Grant Publication No. 2002/0019421) and Plata-Salaman (US Pre-Grant Publication No. 2003/0060423), Thereby resulting in the withdrawal of the rejection. The amendment removing the phrase "capable of being" from claim 9, were it to be entered on the record would be sufficient enough to render moot the rejection to claim 9 under 35 USC 112, second paragraph, thereby resulting in the withdrawal of the rejection.

Continuation of 11. does NOT place the application in condition for allowance because: Applicants' amendment to claim 1 incorporates the subject matter of the previously rejected claim 2. However, the subject matter which was incorporated into the independent claim has been narrowed in scope such that the nicotinic receptor modulator is now selected from a group consisting of galanthamine and the pharmacologically acceptable salts of galanthamine. Previously, the limitation of claim 2 also recited nicotine and its pharmacologically acceptable salts as nicotinic receptor modulators. Similarly, the amendment to claim 5, removes the limitation which recites the release of 5-50 mg of nicotine, thereby narrowing the scope of the rejected claim. Thus while Applicants' amendments do overcome the art currently made of record, it also more critically narrows the scope of the independent claim, as well as dependent claim 5, thereby necessitating a new/additional search by the Examiner.

/MP WOODWARD/ Supervisory Patent Examiner, Art Unit 1615
